Machine Safety Orientation – Registration

The Engineering Student Design Center’s (ESDC) Machine Safety Orientation (MSO) provides certification only for the machines present in the ESDC and covered during the safety class. The ESDC Machine Safety Orientation does not serve as complete safety or operation training for any other equipment.

The Engineering Dean’s Office recharges research groups for participating in the ESDC Machine Safety Orientation. **The cost is $70 per attendee, charged to an appropriate DaFIS account.**

Authorization must be signed by the Principle Investigator (PI), the PI’s designee, Team leader or the department account manager.

Student Teams are not recharged for this course, but must still fill out this form.
